PROFESSIONAL EXPERIENCE & PROJECTS

IT & Software Development Intern | Internship

Mar 2026 - June 2026

Department of Agrarian Reform Provincial Office of Albay - Human Resource Management Office

- **DARPO Albay HR Portal & Management System:** Co-engineered a comprehensive Human Resources portal tailored for agency operations utilizing **Laravel 13**, **Inertia.js**, and a **PostgreSQL (Supabase)** cloud database architecture to streamline manual administrative workflows.
- **Anti-Fraud QR Code Attendance System:** Engineered an automated, high-security attendance system using **Python Flask** featuring a rotating, tokenized QR code mechanism. Prevented proxy time-tracking by implementing rapid real-time token validation and server-side deployment dynamics.
- **Internal Systems Support:** Maintained precise technical documentation for code deployments, API integrations, and database schemas to ensure smooth handovers and continuous system integration.

IoT Networked Energy Monitoring System Thesis Capstone | Lead Developer & System Architect

University of Santo Tomas–Legazpi – College of Engineering, Architecture, & Fine Arts

- Developed an **ESP32-based** real-time energy monitoring and remote power control system utilizing an **MQTT backend** hosted on a Raspberry Pi server.
- Constructed an Android application for live remote monitoring, error recovery, and OTA updates, implementing full API linkages and system optimizations.

Linux System Automation & Troubleshooting | Independent Developer

- Configured Arch Linux desktop environments utilizing **Bash shell scripting** to automate repetitive tasks and optimize resource allocation.
- Diagnosed and resolved kernel-level conflicts, display driver issues, and boot-process failures using system log analysis.

EDUCATION

Bachelor of Science in Computer Engineering | University of Santo Tomas–Legazpi

Aug 2022 - June 2026

- **Academic Scholar**

CERTIFICATIONS

Computer System Servicing NC II Online Course - Certificate of Completion Holder

Sep 2025

TESDA Online Program

SKILLS

Programming & Scripting: Java, Python, PHP, JavaScript, C++, Bash Scripting, HTML/CSS

Frameworks & Databases: Laravel, Inertia.js, React, Python Flask | PostgreSQL (Supabase), MySQL, SQLite, REST APIs

Networking & Infrastructure: TCP/IP, OSI Layers, Subnetting (IPv4), DNS, DHCP, Cisco Packet Tracer, Secure SSH Remote Access

Systems Administration: Linux (Arch Linux daily driver, Ubuntu, Raspberry Pi OS), Windows, Workstation Setup, Log Analysis & Troubleshooting

Tools & Methodologies: Git/GitHub version control, AI-augmented development workflows, Prompt Engineering for rapid prototyping, Technical Documentations
